

## March Reflection 1

Over the month the children are enjoying time outside to explore their outdoor environment with the possum children and educators. The Joey children have enjoyed playing in the sandpit, playing with the cars, lawn mowers and feeling the different textures of the surfaces in the yard. Indoors the children are busy moving about the room some of the children have started to take steps and gain confidence in the room to walk further around their environment. Often in the room we see the children following each other babbling to one another and socializing together as they smile or giggle in their interactions. The children are beginning to recognise one another and often will copy each other when one giggles or squeals. We are seeing the children sitting next to each other parallel playing in their daily interactions in the room. The children are curious to their environment looking out of the window at the flowers we are growing to moving all around the room and under the cots to explore all the areas of the room. The children feel confident in their room and are becoming aware of routines especially when it is time to eat the children will start to crawl or walk over to the tables to be seated.
