

Yellow Group Kinder, Weekly Reflection

Term 1, Week 2

This week was all about settling in and getting to know the environment and the teachers at kinder as this was the first week of full days. It was also time to learn the routines and how the room works. Each child was shown their locker, where to put their water bottles and how and when to wash their hands effectively. They were taught about the stop and go signs that are stuck to the door that leads to the outdoor yard and what to do when stop was on or when go was on. The children also made their own kinder limits during group time to make sure the kinder environment remains safe and fun.

This week was also about making friends so the children had plenty of free play time both in large and small groups to get to know one another.

Some of the popular activities this week were lego, blocks, cooking in the home corner, cooking in the sandpit, art, drawing, magnetic tiles, measuring water and making patterns.
