

## Possum Room July 2021 Reflection 1

The Possum Room have been very busy in the month of July. We have added some different activities on the table we have added some building blocks which the children have enjoyed growing taller and taller. We have also added posting with ice cream sticks and a container we have made. The container has different size holes and the children have been enjoying filling it up and then taking them out.

We have had some rainy days this month so we have been improvising with different activities. We have started a group pasting project with all the children taking turns pasting materials, some of the children enjoyed this so much they didn't want to leave. We noticed the children hiding under chairs so we thought to extend on this interest we would provide the tunnel for the afternoon taking turns crawling through it.

The sandpit is such a big hit we added some big containers with a small amount of water for the children to play with. The children enjoyed scooping it out and pouring it into another container. We ended up getting smaller containers so each child was able to have their own container to use and fill them up then empty them out. We have recently added camping into the room and the children have been enjoying laying in the tent with their sleeping bags and cooking up a storm with the BBQ. They picked up all the food props and pots and pans and brought them all inside the tent and had a mini picnic.
