

Koala Room October 2022 Reflection 2

As we continue our interest and learning about space in the Koala Room, we thought it was only fitting that we make the sun, so that our planets can orbit around it. We spoke about how big we needed to make it and a few children put their hands up and said we needed to make it really big because there are so many planets.

The children enjoyed pasting the sun with all different orange and yellow assortments. Once it dries, we will display it along side our planets and the children will be able to talk about the sun and the planets that orbit it.

With the warmer weather approaching we have been exercising and moving our bodies, the children have been really enjoying yoga. We are fortunate enough to be able to watch and listen to Cosmic Yoga. We are able to choose what cosmic yoga we want to watch whether its "Going on a bear hunt" or "Frozen". As we have been learning about space we decided to watch "Astronaut does Cosmic Yoga in Space" we followed the instructions and movements and learnt about gravity in space. We have also been doing our exercises and movement outside on the grass and the children are able to pick a movement or exercise that they want the group to do, this is always something that they choose to do and as you can see by the photos, they really enjoy it.

The spooky season is upon us, and to start off we wanted to do some spider painting. We started off using orange, black, gold and white, the children then using the spiders started to walk them up and down the page creating different patterns. We also spoke about the size of different spiders and how many legs we could count.
