

Red Group Kinder, Weekly Reflection

Term 1, Week 5 & Week 6

Construction Site Indoors too

Observing children's interest in watching and sharing their excitement to observe builders constructing new yard, A learning experience has been set-up as construction Site for imaginative play & construction

Taking care of our indoor plants together
Well Done Red Group!!

During last two weeks, children in Red Group have shown great interest in getting engaged in art and craft learning experiences. Children were provided with the opportunity to make their face-collage using recycled/reusable materials. Following children's interest, a construction site has been set-up for the children to use their imagination to build and construct the pretend kinder yard as their play-area. Children showed curiosity to know the about the visual images at the pretend construction site such as Danger, safety vest and Hat, Caution etc..

Making Face Collage

Observing children's interest in painting, an opportunity for the children has been provided to learn about primary colours. Children got engaged in mixing primary colour-paints on Canvas paper using buds. Children also got engaged in conversation with educators about what colours they mixed and what new colours they discovered.

Dentist Visit next week in red Group Kinder: Role play opportunity for the children to get engaged in counting teeth and cleaning them.

Children have also started participating in performing daily helping tasks such as watering indoor plants, setting-up tables, leading the group to do “

Acknowledgement of the Country” to contribute as a team in taking care of our physical learning environment.

In music, some new music and movement songs have been added such as hokey-pokey. Children have been provided with opportunity to use props such as clapping sticks, bean bags and Frisbees. The educators drove children's attention towards “Tempo” in music and encouraged them to follow the beats with clapping sticks.

Some children got engaged in building 2D shapes such as square, hexagon, pentagon etc. on light table with their peers.
